

3-A CERTIFIED FOR SAFETY

DIRECT REPLACEMENT PLATES AND GASKETS

THE GOLD STANDARD FOR INTEGRITY IN HYGIENIC PROCESSING EQUIPMENT AND SYSTEMS

3-A Certified Spare Parts

The only 3-A Certified Heat Exchanger Replacement Parts in the World

When WCR manufactures heat exchanger replacement plates and gaskets, it's vitally important that they have the same quality and integrity as original OEM manufactured parts. It's even more imperative when these parts are essential to health and safety in the food, beverage, and pharmaceutical industries. That's why WCR has been awarded the 3-A Sanitary Standards Inc. (SSI) Replacement Parts and System Component Qualification Certificate (RPSCQC) for our direct replacement heat exchanger plates and gaskets supporting a number of OEM models.

What Does 3-A Certification Mean?

SAFETY

Our 3-A RPSCQC certificate is beneficial because it affirms that our parts and system components are compatible with the design criteria found in the relevant 3-A Sanitary Standard, insuring all proper health and safety measures have been taken.

SCRUTINY

Our verification is based on the most stringent criteria available in a relevant base 3-A Sanitary Standard or 3-A Accepted Practice. WCR is subject to the same re-inspection requirements as holders of 3-A Symbol Authorization

PEACE OF MIND

Because our 3-A certification is based on ANSI requirements to promote acceptance by USDA, FDA, and state regulatory authorities, our partners can be assured that the health and safety of consumers is paramount.

Under the new 3-A certification, WCR supplies direct replacement heat exchanger plates and gaskets for a range of 11-10 plate-type heat exchanger models, including the R5 Series, VT Series, Clip Series, and several others. All of WCR's 3-A certified sanitary heat exchanger replacement parts are proudly made in America from high-quality bright annealed stainless steel, with the ability to offer rapid turnaround and delivery.

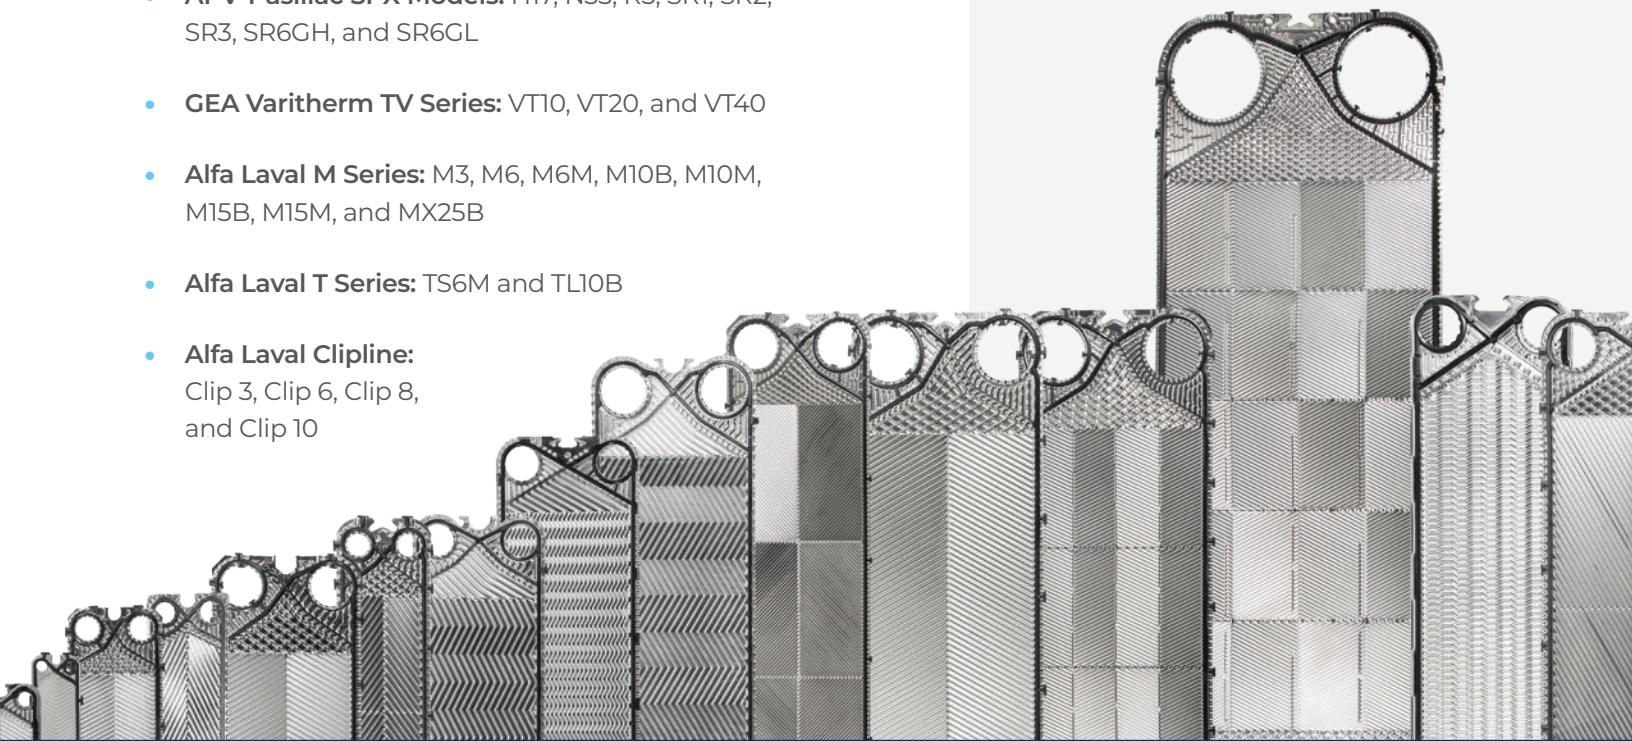

3-A certification for major OEMs

WCR 3-A-certified replacement plates and gaskets include the VT Series, R5 Series, CLIP Series, and many more.

- **APV-Pasillac SPX Models:** H17, N35, R5, SR1, SR2, SR3, SR6GH, and SR6GL
- **GEA Varitherm TV Series:** VT10, VT20, and VT40
- **Alfa Laval M Series:** M3, M6, M6M, M10B, M10M, M15B, M15M, and MX25B
- **Alfa Laval T Series:** TS6M and TL10B
- **Alfa Laval Cipline:** Clip 3, Clip 6, Clip 8, and Clip 10

Originally developed as a requirement for the dairy industry, the 3-A certification program uses a third-party verification process to affirm the integrity of hygienic processing equipment and systems supporting the food, beverage, and pharmaceutical industries. Authorization to display the registered 3-A Symbol on dairy and food processing equipment conveys assurance that the equipment meets specific design criteria and sanitary standards.
